

# B.I.E. Group Middle East - Providers of independent and impartial quality control services and manpower provision to the Engineering Sector

## Customer Base

Founded in 1934, the BIE Group has become a market leader specialising in quality control and manpower services to the hydrocarbons, power, minerals and metals, infrastructure, and engineering sectors. We are certified to ISO 9001 and are committed to improving our processes to ensure the client always receives a service of the highest standards of professionalism and integrity.

To achieve these aims and ensure that clients demands for ever-increasing standards of quality and service at a optimal price, BIE has developed a process that provides

**Tailored Service** – Each client has different requirements so BIE tailors its processes to meet a client’s individual needs and budget

**Rapid Response** – BIE provide rapid response to customer’s requirements as we understand that time and project over run is costly. We specialise in quickly finding manpower to meet the client’s needs.

**Competence** – BIE selects the highest calibre personnel to provide a level of quality, experience and knowledge necessary to achieve the client’s requirements. BIE actively participates with regulatory bodies and standards committees in the development of international standards and regulations.

**Global Reach** – BIE has staff located near all manufacturing centres throughout the world. The success of a project is dependant on the “on time” and “on budget” delivery of the material, services or products. BIE provide the client with a range of services to support their needs and requirements throughout the world.

From the start of a project a dedicated project coordinator is assigned to set up the assignment(s), fully understand the customer’s requirements and select the most appropriate inspector. The coordinator works with the Vendor and Inspector to ensure that programs are maintained; communications are dealt with promptly and provide any support to the inspector.

## Inspection Capabilities

- Umbilicals
- Christmas Trees
- Subsea Controls
- Coatings – Paints and Plastics
- Valves
- Pressure vessels, heat exchangers, etc
- Materials, flanges ,plate, pipe and fittings
- GRP Fabrications
- Casting and Forgings
- Rotating equipment
- Skid units
- Wellhead and drilling equipment,
- Oil Country Tubular Goods
- Structural and welded fabrications
- Lifting Equipment
